ILLUSTRATION, NOT A PRODUCT SCREENSHOT

Good first tasks vs keep a human

TASK	GOOD FIRST TEST	KEEP A HUMAN APPROVING
01 Invoices	 Read and draft entries for accounting software	→  Posting or paying the bill
02 Forms	 Fill fields from your own records	→  Pressing submit
03 Technical drawings	 Pull out details for a quote	→  Specs sent to a customer
04 Proposals	 Draft the proposal from your notes	→  Sending it to the client
05 Videos	 Make the first rough edit	→  Publishing the final cut

ILLUSTRATION, NOT A PRODUCT SCREENSHOT

Is this a good first task?

One point for each yes.

Does someone on your team do this screen task every week?

Does it follow the same steps each time?

Can a person check the result quickly?

Can a human approve before anything sends, pays or submits?

0

Not yet, pick a different task

1-2

Run a small supervised test

3-4

Strong first task to test

“ OpenAI's benchmarks are its own. Measure your task before you scale.

Four moves this week

01

List the screen tasks your team repeats every week

02

Pick one and time it by hand

03

Test it with a human approving anything that sends, pays or submits

04

Compare time and errors, then decide whether to scale
